

CHANDAN KHETO

Software Developer | AI LLM

📍 Kolkata, India | 📞 +91 8942947731 | ✉️ chandankheto2024@gmail.com | [🌐 LinkedIn](#) | [🐙 GitHub](#)

ABOUT

Software Development Engineer with experience in Python, FastAPI, React, and AI/LLM systems. Built end-to-end AI-powered applications including CRM platforms and RAG-based document intelligence systems, integrating LLMs for intelligent automation and data extraction. Strong in backend API development, full-stack integration, and designing scalable AI-driven solutions.

TECHNICAL SKILLS

Programming & Libraries: Python, Java, JavaScript, DSA, OOPs, SQL, Numpy, Pandas

Frontend: React.js

Backend: FastAPI, Flask, Node.js

Database: MySQL, PostgreSQL

Machine Learning: Scikit-learn, Linear & Logistic Regression, Pytorch

Generative AI: Transformers, RAG, GPT, LLaMA-3, LangChain, FAISS, Hugging Face, LLM Integration

Deployment: AWS, Docker, GitHub

STRENGTHS

- Strong problem-solving and debugging ability & Capable of building complete end-to-end AI Application
- Excellent English communication and collaboration skills

EDUCATION

B.Tech in Electronics and Communication Engineering (ECE) | 2019 - 2023

Guru Nanak Institute of Technology, MAKAUT, Kolkata, India

PROJECT HIGHLIGHTS

AI Document Intelligence System | React, FastAPI, LangChain, FAISS, HuggingFace | [🔗 GitHub](#)

Built a full-stack RAG-based document QA system supporting PDF, DOCX, and TXT formats. Implemented semantic chunking and persistent FAISS vector indexing for efficient retrieval. Integrated FLAN-T5 for offline, context-grounded response generation. Developed a modular FastAPI backend with React-based UI and optimized retrieval pipeline to improve answer accuracy.

AI-Powered HCP Interaction CRM | React, FastAPI, MySQL, LangChain, Groq API | [🔗 GitHub](#)

Built an AI-driven CRM system to convert natural language interaction notes into structured data using LLMs. Implemented chat-based interaction logging with automatic extraction of HCP name, topics, and sentiment. Developed FastAPI REST APIs and integrated a React-based UI for real-time form auto-filling. Designed MySQL database storage with dynamic interaction history tracking.

AI Resume Matcher | React, FastAPI, SentenceTransformers, Mistral-7B | [🔗 GitHub](#)

Built a retrieval-augmented resume matching system using MiniLM embeddings for semantic similarity. Integrated Mistral-7B via HuggingFace API for skill-gap analysis and resume improvement suggestions. Developed FastAPI backend with React-based UI and implemented PDF report generation.

AI Personalized Tutor – Real Time Voice + LLM System | FastAPI, Streamlit, LLaMA-3, gTTS | [🔗 GitHub](#)

Developed a real-time AI-powered learning assistant enabling voice and text-based interaction. Implemented speech-to-text using Google SpeechRecognition, integrated LLaMA 3 (via OpenRouter API) for step-by-step reasoning, and added text-to-speech using pyttsx3. Architected a modular backend using FastAPI.
